

Request for Funds In Support of An Expedition to the Antarctic Continent

William Dyer Ph.D.

Professor of Geology, Miskatonic University

ABSTRACT

Being a request for funds necessary to support a lively expedition to the southernmost continent of the world. Reasons for the outlays shall be explained herein.

1. A Description of the Expedition

We are going to the antarctic continent to look for a weird city.

1.1. Required Personnel

We will require not more than ten (10) graduate students. Some aptitude is important, though if they are, let us say, not the *finest* students in the University, that will be fine.

2. Required Materials

We will need the following things procured:

Equipment		
Name	Quantity	Notes
Flashlight	30	Shock and cold resistant
Batteries	100	Cold resistant
Anti-monster spray	50	Extra-strength
